

Metron-Athene News Release

METRON AWARDED VMWARE AUTHORIZED CONSULTANT STATUS

September 26th 2008, Woodland Hills, California, USA: Turnersville, NJ, USA - Leading performance management and capacity planning specialist, Metron, has been awarded the status of VMware Authorized Consultant, the latest stage in the two companies' strengthening partnership.

The VMware Authorized Consultant accreditation recognizes that Metron is a specialist in virtual infrastructure and VMware technology, and authorizes the company to deliver consulting services on VMware technology. Of particular relevance to Metron will be the ability for the company's consultants to provide VMware Virtualization Assessments using VMware's tools, as well as other related consultancy services.

Earlier in the year, Metron announced the VMware Service Acceleration Kit (SAK) for capacity management applications. Designed to support VMware's Operations Framework, the VMware SAK is available for download from the VMware Partner Central web portal and comprises best practice descriptions and demonstrations, extensive marketing support, case studies and a free thirty day trial of the Athene Virtual Appliance. The Virtual Appliance provides support for VMware (as well as all other leading virtual and physical environments) in order to analyze performance, provide reports and a centralized capacity database across the entire enterprise.

Metron and VMware are also hosting a series of seminars on the role of capacity planning in a virtualized environment. For more information, please visit www.metron-athene.com

About Metron-Athene Inc.

Metron Technology was founded in 1986 and is Europe's leading Performance Management and Capacity Planning specialist. Metron-Athene Inc is a wholly owned subsidiary of Metron technology Ltd. At Metron we are committed to continue developing products to provide IT users the maximum benefits at the least cost. We are delivering this by creating automated products that embody an increasing level of intelligence to address the continuing evolution and complexity of hardware environments and software applications.

Metron's Athene performance management software is the most cost-effective product in its class providing fully integrated ITIL-compliant capacity management with automatic performance analysis and reporting for UNIX, Linux, Windows and Mainframe Servers. Athene 8 is the world's most scalable performance management software for real and virtual environments with the Universal Capacity Planning Module interfacing with all third-party systems management products.

In the US Athene is installed for clients such as AIG Inc, Airline Tariff Publishing, CNF Inc, eBay, First Data, Blue Cross/Blue Shield, Internal Revenue Service, LA County, Lehman Brothers, Pentagon, Pindar, Safeway, TDS Telecom, Telecheck Services, US Customs. The company works in partnership with leading IT suppliers such as Hewlett Packard, Microsoft Systems, VMware, Computer Associates, IBM, Capgemini, and Oracle. The world's leading outsourcing companies are now using Athene combined with expert ITIL consultancy and training services as a key element of their Service Management and Delivery.

Athene is a registered trademark of Metron Technology Ltd and Metron-Athene, Inc.

© ITIL is a Registered Trade Mark, and a Registered Community Trade Mark of the Office of Government Commerce, and is Registered in the U.S. Patent and Trademark Office.
