

Metron-Athene News Release

xoserve LICENCES METRON'S ATHENE PERFORMANCE MANAGEMENT SOFTWARE

15th February 2008, Woodland Hills, California, USA: Metron announces that xoserve, the company formed in 2005 to provide gas transportation services on behalf of all the major gas network companies in the UK, has licensed its Athene performance management software. The contract also includes consultancy and training services, together with a five year maintenance agreement.

xoserve is jointly owned by the major gas network companies and is responsible for managing the complex commercial interfaces between these major gas transporters operating in Britain and their customers, the gas shipper companies.

Delivering a fast, consistent and efficient service to the gas industry is fundamental to xoserve, and the effective management and monitoring of the company's IT systems plays a major role in supporting this objective. Metron's Athene product will be used by xoserve to manage the UK Link Systems, based at data centres in Peterborough and Wellingborough, and the major technology refresh and data migration project of this system, which is currently being undertaken. UK Link provides a wide range of essential information and systems, including support for the processes that enable customers to switch between suppliers, details about sites, meter and billing information, and gas transmission data.

Athene is already well established in the gas industry, having been used for many years by Transco, and subsequently by National Grid. It is also used by Indian-based Tata Consulting who are responsible for managing xoserve's IT systems under the terms of an outsourcing contract.

Notes for editors

About Metron-Athene Inc.

Metron Technology was founded in 1986 and is Europe's leading Performance Management and Capacity Planning specialist. Metron-Athene Inc is a wholly owned subsidiary of Metron technology Ltd. At Metron we are committed to continue developing products to provide IT users the maximum benefits at the least cost. We are delivering this by creating automated products that embody an increasing level of intelligence to address the continuing evolution and complexity of hardware environments and software applications.

Metron's Athene performance management software is the most cost-effective product in its class providing fully integrated ITIL-compliant capacity management with automatic performance analysis and reporting for UNIX, Linux, Windows and Mainframe Servers. Athene 8 is the world's most scalable performance management software for real and virtual environments with the Universal Capacity Planning Module interfacing with all third-party systems management products.

In the US Athene is installed for clients such as AIG Inc, Airline Tariff Publishing, CNF Inc, eBay, First Data, Blue Cross/Blue Shield, Internal Revenue Service, LA County, Lehman Brothers, Pentagon, Pindar, Safeway, TDS Telecom, Telecheck Services, US Customs. The company works in partnership with leading IT suppliers such as Hewlett Packard, Microsoft Systems, VMware, Computer Associates, IBM, Capgemini, and Oracle. The world's leading outsourcing companies are now using Athene combined with expert ITIL consultancy and training services as a key element of their Service Management and Delivery.
